

KinderConnect – Provider Application Status

The **Application Status** page is used to search for and view application details. It is a read-only page that pulls the most current data from our system.

Note:

- Records will be displayed for Initial Applications in which the county identified they reviewed the Release of Information for the Requested Child Care Provider for those which are Pending or Denied without PAD
- Records will no longer be displayed when Applications change to Active/Approved and/or Denied with PAD
- Applications which are Denied without PAD will be sent for one year after the Effective Date

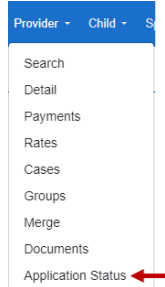

C The **Search Results** grid contains all applications with their Application Status included. **Note:** The Application Status will show either Denied Without PAD or Pending.
